Research and Development 2010

Last Updated Monday, 17 October 2011

Fundamental Research Grant Scheme (FRGS)NOTITLEPRINCIPLE RESEARCHERCONTACT (name@utem.edu.my)1Diesel and Bio-diesel Fuel Deposits Investigation by Using Simplified Method TestDr. Yusmady bin Mohamed Arifinyusmady2Formulation of Nanofluid Using Carbon-based Materials for Heat Transfer MediaImran Syakir bin Mohamadimran3Investigation on The Use of Micro-Perforated Panel to Control Transmission Loss at Mass-Air-Mass Resonance of a Double-Leaf PartitionDr. Azma Putraazma.putra4Development of a Longitudinal and Lateral Driver Model for Autonomous Vehicle ControlMohd Zakaria bin Mohd Nasirmzakaria5Development of a Novel Dual Acting Magnetic Damper for Automotive Suspension SystemMohd Hanif bin Harunhanif6Antilock Brake System (ABS) Control for Motorcycle Using A Novel Magnetorheological Brake SystemFaizul Akmar bin Abd. Kadirfaizul7Modeling The Acoustic Performance of a Hybrid Microperforated Panel-natural waste Fibre as an Eco-Friendly Sound Absorber and Noise BarrierNor Liana binti Sallehnorliana8The Study of Characteristics of Honeycomb Subjected to Quasi-Static and dynamic LoadingProfesor Dr. Md. Radzai bin Saidradzai9Semi- Acvtive Control of Secondary Suspension System for Improving Railway Vehicle Dynamics Performance using Magnetic DamperDr Khisbullah Hudhakhisbullah10Investigation of Brake Judder Phenomenon by using reduced Scale Brake DynamometerDr. Muhammad Zahir bin Hassanzahir11Development of An Adaptive Prosthetic Leg for Amputees using Magnetorheological DamperSyahibudil Ikhwan bin Hj. Abdul Kudussyahibudil12Modeling of Vibration based Energy Harvesting from Human Body MotionDr Roszaidi bin Ramlanroszaidi13A New SEA Model for Predicting Car Interior NoiseWan Mohd Farid bin Wan Mohamadfarid14Investigative Study on The Acoustical properties of Malaysian WoodDr Janatul Islah Binti Mohammadjanatul15Investigation on The Vibration Input Power from Structure-Borne Sound SourcesHairul bin Bakrihairul.bakriShort Term Grant (PJP)NOTITLEPRINCIPLE RESEARCHERCONTACT (name@utem.edu.my)1Design and Construction of Low Cost Impedance Tubes to Measure Sound Absorption Ceofficient and Sound Transmission LossDr Azma Putraazma.putra2Nonlinear Duffing Oscillator for Energy Harvesting DevicesDr. Roszaidi bin Ramlanroszaidi3Experimental Study of A Streering Wheel VibrationDr. Muhamad Zahir bin Hassanzahir4The Application of PID Scheme to Supress Noise and Vibration Level in Hand Powered Portable MachinesMohd Azli bin Salimazli5Asset Life Cycle Management Framework Study for Public Sector OrganisationReduan bin Mat Danreduan.dan6Modeling, Simulation and Development of an Antilock Brake System (ABS) Control for Motocycle using Magnetoheological Brake SystemMohd Rody bin Mohamad Zinrody7The Usage of Solar Energy to Reduce Temperature of Hot Air in The CarSuhaimi bin Mishasuhaimimisha8Development of An adaptive Prothetic Leg for Amputees Using Magnetorheological DamperSyahibudil Ikhwan bin Hj. Abdul Kudussyahibudil9Development of a Novel Dual Acting Magnetic Demper for Automotive Suspention SystemMohd Hanif bin Harunhanif10Utilization of Waste Palm As An Alternative Powser Reinforcement In Materials Friction Non-Asbestos In Manufacturing Motocycle Brake PadDr. Hady Effendyhady11Development of PC Based Virtual Reality Drive SimulatorMochamad Safarudinandims12Modeling and Validation of 18-DOF High Mobility Multipurpose Wheeled Vehicle (HMMWV) model for military Application. Fauzi bin Ahmadfauzi.ahmad13The Effect of Gear Ratio on Turbo-Alternator to Produce Higher Power Generation in The Spark Ignition EngineSafarudin Gazali Herawansafarudin14The Design and development of Intergrated Renewable Energy Mini Power Generation Plant for UteM Campus in The Process Toward Becoming Self Sufficient in Term of Power Supply. Prof. Madya Ir. Abdul Talib bin Dintalib15The Design and development of Intergrated Renewable Energy Mini Power Generation Plant for UteM Campus in The Process Toward Becoming Self Sufficient in Term of Power Supply. Mohd Afzanizam bin Rosli (FKM) / Ir. Sivarao Subramonian (FKP) / Ranjit Singh Sarban Singh afzanizam16Characteristic and Measurement of Crack Path Under Mixed -n Mode Loading Conditions bu using The NDT (Ultrasonic Testing) Method Prof. Madya Abd Salam bin Md Tahirsalam17Optimization of Cross-Flow Turbine For Pico Hydro SystemProf. Madya Juhari bin Ab. Razakjuhari18From Practise and Application Oriented to Conventional Engineering Approach : from student perspectiveMuhd Nur Azmi bin Nordinmnazmi19Design and Development of renewable boigas Energy Syustem for Boilers and Gas EngineShafizal bin Matshafizal20The Importance of Industrial Training Program Toward Students Holistic DevelopmentNortazi binti Sanusinortazi21Study of Liquid Sloshing Effect in A ContainerMohd Irwan bin Mohd Azmimohdirwan22Analytical Study on Deformation Behaviour of Bolt-Nut Joint Under Transverse LoadingHairul bin Bakrihairul.bakri23Investigation on The Acoustic Properties of A Micro-Perforated Double-Leaf Pertition Filled with Natural Waste Fibrous MaterialsWan Mohd Farid bin Wan Mohamadfarid24Development of Smart Automotive Actuator using Shape Memory Alloy MaterialHerdy Rusnandyherdy25A Study of Diesel and Bio-Diesel Fuels Deposit Formation Due to Feul Spray ImpinggementDr Yusmady bin Mohamed Arifinyusmady26Development of Personal Electric PoweredVehicle (PEV) for UTeMMohd Adrinata bin Shaharuzamanadrinata27Modeling, Simulation and control of 3-Dof Motion Plateform for Vehicle Dynamic SimulatorFauzi bin Ahmadfauzi.ahmad28Development on Hils of Automatic Steering SystemMohd Zakaria bin Mohammad Nasirmzakaria29Numerical Analysis on The Behavior of Droplet Motion for Car Wind Screen by Using Lattice Boltzmann MethodMohd Rody bin Mohamad Zinrody30Development of Electrical Scooter for Green Campus, In Case : PAR Dispatch VehicleSafarudin Gazali Herawansafarudin31Design and Fabrication of A Lightweight Dry Clutch Disc for A Mini Farming TractorFudhail bin Abdul Munirfudhail32Metal Transfer Studies in Shielded Metal Arc Welding (SMAW)Dr S Thiru Chitrambalamthiru33Modelling Automotive NHV Using Hybrid Finite Element Method and Ststistical Energy AnalysisProf Madya Ahmad Rivaiahmadrivai34Development of A Parametric Driver Model for Autonomous Vehicle ControlFaizul Akmar bin Abdul Kadirfaizul35The Study of 3D CAD Data of Reverse Engneering Technology in The Generastion of Standard Triangular Language (STL) FormatHambali bin Boejanghambali
